modec.com eco

modec.com

The modec.com/com eco is designed to provide perfect protection for perfect stamper surfaces.

Both wet and dry surfaces can be coated for further handling or archiving.

The com/com eco can be used to apply water based lacquer on punched or unpunched stampers and comes complete with a recirculation drying oven. It features an integrated spin coater with DI-water rinsing and a laminar downflow.

The difference between the 2 versions: The modec.com offers a fully automatic dosing and lacquering process. The modec.com eco provides a manual process, whereby lacquer is applied by hand and the spinning process is started by pressing a button.
